Ideation Phase
Define the Problem Statements

Date	08 March 2026
Team ID	
Project Name	Ucab – Cab Booking System
Maximum Marks	2 Marks

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1 (User/Passenger)	A busy urban commuter who relies on cab services daily	Book a nearby cab quickly and reach my destination on time	Existing apps are slow, show inaccurate availability, and have unreliable fare estimates	No real-time cab tracking or transparent pricing in one unified platform	Stressed, late, and frustrated with unreliable transport options
PS-2 (Driver)	A registered Ucab driver looking to maximize ride earnings	Accept ride requests efficiently and navigate to pickup/drop-off	Ride requests are poorly matched by location and payment is manual and slow	The platform lacks automated ride assignment, GPS guidance, and instant digital payment	Underutilized, underpaid, and unable to manage rides effectively
