UCab – Empathy Map Canvas

User Persona: Urban Commuter (Rider) | Project: Ucab Cab Booking System

User / Persona Sarah – a busy urban professional, age 25–40, who commutes daily and travels frequently for work and personal errands. She needs fast, reliable, and affordable transport at any time.	**What do they need to DO?** Book a nearby cab instantly, track the cab in real time, pay digitally, and reach her destination safely and on time without hassle or uncertainty.
Thinks (Beliefs & Concerns) • "I hope the cab arrives quickly and the driver is verified and trustworthy." • "Is the fare estimate accurate? I don't want to be overcharged." • "I need to know where my cab is at all times during the ride." • "Will my payment be secure and my booking history be saved?"	**Feels (Emotions)** • Anxious about cab availability during peak hours or bad weather. • Relieved and confident when she can track the cab in real time. • Frustrated when booking fails, the app crashes, or the driver cancels last minute. • Satisfied and loyal when the experience is smooth, fast, and transparent.
Sees • Live map showing nearby cabs and estimated arrival times on the UCab app. • Fare breakdown and cab type options (economy, premium, shared) before booking. • Friends and colleagues using other ride-hailing apps and sharing experiences. • Promotions, discounts, and loyalty rewards advertised within the app.	**Hears** • Friends recommending UCab for its real-time tracking and transparent pricing. • Colleagues complaining about surge pricing and long wait times on other apps. • News and social media posts about road safety, ride cancellations, and data privacy. • In-app notifications: "Your driver is 3 mins away" and "Ride completed. Please rate."
Says • "I just need a cab that shows up on time and doesn't cancel on me." • "The map and real-time tracking make me feel so much safer." • "I love that I can see the fare before I book — no surprises." • "I recommended UCab to my office friends because it's simple and reliable."	**Does** • Opens UCab app, enters pickup and drop-off location, and selects cab type. • Monitors cab arrival on the real-time tracking map. • Pays via saved digital payment method after ride completion. • Rates the driver and raises a support ticket if there is any issue.
Pains (Frustrations & Fears) • Long waiting times and unavailability of cabs during peak hours. • Driver cancellations causing delay and stress, especially before important events. • Hidden or surge pricing leading to distrust and	**Gains (Motivations & Goals)** • Instant cab availability with real-time tracking for safety and peace of mind. • Transparent, upfront fare estimates before every booking. • Seamless digital payments with automatic receipt

dissatisfaction. • Poor payment security or no digital receipt for reimbursement purposes. • App crashes or unresponsive UI during an urgent booking attempt.	generation. • Driver rating system to ensure quality, verified, and trustworthy drivers. • Booking history and support ticket system for accountability and easy issue resolution.
